Experience

Full stack dev (remote, project-based) **powersiot.com** Port Jefferson Station, NY, USA **11/2021 - current**

- designed and developed a field service management system (technician scheduling and dispatch) using ReactJS, jQuery, Bootstrap, PHP, and MySQL integrated to Google Maps, Cognito Forms, and twilio SMS APIs
- extended the system with a custom CRM, Invoicing, and Payments modules integrated to Quickbooks Online API
- designed and developed modules for Inventory Management (Vendors, Products, Warehouses, Storage Bins, Serial Numbers), Payroll, and Purchasing (Requisition, RFQ, PO) with integration to Shippo API
- developed Punchlist module combining multiple complex data into a single UI optimizing project delivery

Solo Founder **Plexys Technologies** Los Baños, Laguna, PH **01/2020 – 11/2021**

- bootstrapped a software development agency/startup – failed to take off but learned a ton of knowledge and experience in business management, team management, and product development
- designed and developed web based products for business management - ERP, CRM, HR, Payroll, Accounting, Inventory Management, Purchasing
- created and managed a team of five (5) junior software engineers and one (1) associate business developer

Field Application Engineer (remote) **GEM (gembo.co)** California, USA **10/2019 - 03/2020**

- GEM is a predictive maintenance startup using IoT, big data, and analytics (Availability, Performance, and Effectiveness)
- installed, configured, and maintained IoT devices and sensors on diverse manufacturing equipment
- gained extensive experience in Computer Networking, Linux Administration, Raspberry Pi, Python, NodeJS, MySQL, Nginx, Apache Kafka, Apache ZooKeeper

Remote full stack dev, fulltime **DSII.net** New York, USA **04/2014 – 10/2021**

- led the design and development of software products for diverse clients using React, jQuery, Bootstrap, PHP, MySQL
- built and maintained business-critical internal web applications supporting multiple teams and business processes
- built custom Property Management System, custom CRM with integration to Authorize.net, custom CMS, a Kiosk app, an online polling app, and multiple mobile apps (using jQuery mobile and Cordova)

Mobile app dev **Ballet.PH** Pasay, PH **01/2014 – 03/2014**

- designed and developed mobile app using Sencha Touch and Apache Cordova deployed on Android and iOS app stores

Freelance web dev **wencano.com** **01/2009 – 12/2013**

- developed lots of HTML websites, Wordpress themes, and e-commerce websites from .PSD and .AI design files for various US-based design agencies: esdesignusa.com (USA), vargaswebsites.com (USA), brincasoftware.com
- brain-train.com.ph: designed, developed, and deployed Joomla! CMS-based website (active 2010-2019)
- ballet.ph: designed, developed, and maintained ballet.ph website (active 2011-2018)
- legendhotels.com.ph: deployed multiple Wordpress websites for SEO

Education

Bachelor of Science **University of the Philippines** **08/2015 – 07/2018 (completed)**
in Applied Physics Los Baños Campus 06/2005 – 10/2009 (stopped)
